

Arkansas Just Got Cooler

Cold Compass Storage is a full service, public refrigerated warehouse operation. Our expertise in freezing, cooling and tempering enables customers to comfortably focus on their core competencies.

Our Warehouse Services Include:

- Racked or Bulk Freezer, Cooler
- Blast Freezing
- Order Pallet Picking / Case Picking
- Transloading
- USDA Import / Export Inspections
- Cross Docking and Load Consolidation
- State of the Art Radio Frequency (RF) Warehouse Management System (WMS)
- Electronic Data Interfaces (EDI)
- **Customer Web Portal** — Secure portal 24 hours a day. Customers can access lot information/histories, pending/shipped orders, run inventory reports, and email html and/or CSV file formats of pertinent queries performed

- **Customizable WMS** — Customer workflow customization simple to complex — includes documents, special picking preferences by product and/or consignee, labels, etc. System can track all movement of product from receipt to shipment confirmation real time
- **Customizable Inventory Tracking** — Dates, pallet license plates, box serial numbers, production batch codes, weights, track establishment numbers, etc

Handling

- Verification of count and condition of product
- Application of RF bar code identification tags to every pallet

Storage

- **Fully Convertible Storage Space:** capable of temperatures ranging from -10° F to 40° F
- **QuickFreeze™:** Tunnels and high velocity air movement to quickly remove heat from fresh product
- **Room Freezing and Chilling:** In-room temperature reduction based upon customer specifications
- **Product Tempering:** Increasing core product temperature according to customer specification

Order Assembly

- Retrieval of full pallet or individual cases as specified
- **Order assembly:** Single case order picking, stretch wrapping, and marking of pallet with shipping identification
- **Pallet Module Building:** Customized rainbow pallet assembly of specific products to accommodate specific shipments

Cold Storage is in Our Blood

Other Warehouse Services:

- **Case Weight Taking:** RF bar code scan to retrieve and tally catch weight boxes with recap total
- **Clamp Equipment Loading / Unloading:** Forklift mounted attachment used for the mechanical handling and palletizing of product
- **Cross Dock / Trans-loading:** Receiving product in full pallet quantities to be staged for immediate reshipment
- **Hand-stack Loading / Unloading:** Manpower provided to palletize or floor load individual cases/units
- **Labeling / Stamping:** Product packaging or cases that need to be specially stamped or labeled
- **Re-Palletizing, Spreader:** Insertion and removal
- **Short Hold Storage:** Intact customer orders received and held in storage for short periods (usually less than 3 days) prior to pick-up or re-shipment
- **Slip-sheet Loading / Unloading:** Pallet quantities of product received or shipped using slip-sheet and forklift equipment with special attachment
- **Stretch Wrapping:** Plastic stretch wrapping of palletized product for extra protection while in transit or while being stored
